**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 24 March 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 5,11 and 17 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 1, for example, necessarily requires causing the energy-reactive marking material to be over the surface to enable causing it to adhere. If applicant intends a particular distance from the substrate or particular intervening layers those limitations must be clearly recited.

Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Folk et al and Meneghini et al.

Folk et al discloses marking of qualified semiconductor packages subsequent to testing (col.1, lines 23-24). The reference does not disclose thermal transfer ink printing using a laser to create the mark.

Meneghini et al discloses thermal transfer ink printing using a laser to mark semiconductor devices (col.1, lines 13-15). See also col.1, line 62 - col.2, line 13.

It would have been within the scope of one of ordinary skill in the art to combine the teachings of Folk et al and Meneghini et al to enable the marking step of Folk et al to be performed.

Claims 19-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Folk et al and Meneghini et al as applied to claims 1-18 above, and further in view of applicant's admitted prior art and Corley et al.

The process of the combination of Folk et al and Meneghini et al does not include reworking marks considered to be necessary of reworking.

Applicant admits that smudging of ink marks and deterioration of the quality of ink marks over time resulting from changes in stamp surface condition was known prior to applicant's invention or from removal due to abrasion (instant pages 2 and 3). In both cases, it is inherent that a comparison between an ideal/acceptable mark and the actual mark in question is being discussed. Corley et al discloses that marks can smear or fall off resulting in incorrectly marked die and removal of the mark using a solvent (col.1, lines 30-40). It would have been within the scope of one of ordinary skill in the art to remove the unacceptable or non-useful mark of the prior art to provide a position to produce a useful mark and to enable a useful mark to be created and to employ the method of Corley to enable removal of the marks.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
